DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Claims 1-12 and 34-45**, drawn to calibrating an imaging device, classified in **class 348, subclass 739**.
 - II. **Claims 13-23, 28-33, and 46-56**, drawn to calibrating a cathode ray tube, classified in **class 348, subclass 776**.
 - III. **Claims 24-27 and 57-60**, drawn to measuring output of a display device, classified in **class 348, subclass 742**.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions **I** and **II** are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because calibrating a cathode ray tube can be part of **I**. The subcombination has separate utility such as calibrating a television or a computer monitor.
3. Inventions **I** and **III** are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as

Art Unit: 2863

claimed because calibrating a display device can be part of I. The subcombination has separate utility such as calibrating a liquid crystal display or a plasma display.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II or III restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. A telephone call was made to Kelly Fitzgerald on 5/22/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
